

BabyBabyOhBaby

Bonding With Your Brilliant & Beautiful Baby Through Infant Massage

In the beginning, the entire massage may be only still touch. It can be five minutes or thirty minutes. It doesn't matter—whatever your baby is ready for. It may take a month or more to work up to a massage that includes all the strokes. There's no right or wrong order and you may not get to every part every time. That's OK. You can start anywhere or continue anywhere. Think of it as a dance that you and your baby improvise together.

This DVD is a practical guide to infant massage. It is not medical advice. You should review your massage program with your doctor before beginning.

Infant massage is not medical treatment or therapy.

If your baby shows signs of discomfort or distress during the massage, STOP. Consult with your doctor prior to resuming.
